Pension systems in LAC

- **Low coverage** mainly driven by high informality
- **Low replacement rates**
- **High pension expenditure** as % of GDP
- Societies **poorly prepared** for retirement

Y, sin embargo, esto no
es lo más preocupante

EL PROBLEMA
SIEMPRE 'SE
PATEA'
HACIA
ADELANTE

Background

- Need of data to have a **meaningful debate** about pensions in the region.
- Current pension indicators:
 - Dispersed
 - Methodological differences (not comparable)
 - Different sources of data

The IDB has been part of the region's efforts

Red**PLAC**
RED DE PENSIONES EN
AMÉRICA LATINA Y EL CARIBE

IDB Pension Indicators

Need

To fill the data gap by constructing a comparable and comprehensive set of pension indicators

Objectives

1. Create a conceptual framework to guide what type of data is needed and how to structure it
2. Identify what information is missing and create a platform to share and update the data

Sources

- Social Protection Longitudinal Surveys (SPLS or ELPS)
 - IDB's Labor Markets and Social Security Information System (SIMS)
 - Ministries of Finance, regulators and official data
-

IDB Pension Indicators

Dimensions

Performance (105)		Environment (47)		Design (43)	
Adequacy and redistribution (90)		Labor Market (24)		Governance (18)	
		Demographics (9)	Economics (7)	General Description (14)	
			Capital Markets (7)	Parameters (11)	
		Society Preparedness (19)		Sustainability (11)	
Coverage (12)	Density (3)	Preparedness (11)	Awareness (8)	Fiscal (8)	Social (3)

225 Indicators

Environment

Context and the **main trends** affecting the pension system, such as:

- Demographics
- Macroeconomic performance
- Labor and capital markets

Demographics:

- Fertility rate
- Life expectancy at birth
- Life expectancy at 60
- Life expectancy at 80
- Dependency ratio

Economics:

- GDP per capita
- GDP growth
- Inflation rate
- National savings rate

Labor Market:

- Labor force participation
- Youth labor participation
- Prime-age labor participation
- Old-age labor participation
- Informal labor

Capital Markets:

- Domestic credit by banks
- Deposits to GDP ratio
- Insurance assets to GDP
- Stock market capitalization
- Pension fund assets to GDP

Environment

Self-employed,
total

Workers at or under
minimum wage

Design

General characteristics of the system, as well as information on relevant parameters:

- Contribution rates
- Legal retirement age
- Vesting periods

General description:

- PAYG and Fully-Funded systems
- Voluntary savings
- Special pensions
- Tax incentives for savings

Parameters:

- Contribution rates
- Retirement age
- Wage ceilings
- Indexation rules
- Contribution requirements

Governance:

- Multi-Funds
- Equity
- Investments abroad
- Foreign investments
- Fees for fund management

Design

Average total contribution rates
(Employer + Employee)

Retirement age

Source: Social Security Administration (Social Security Programs Throughout the World: The Americas, 2015).

Performance

Information on the effective **results of the pension system**, including:

- Active and passive coverage
- Contributions density
- New indicators about adequacy and redistribution

Coverage:

- Pension contributors
- Contributory pension recipients
- Non-contributory pension recipients

Contribution density:

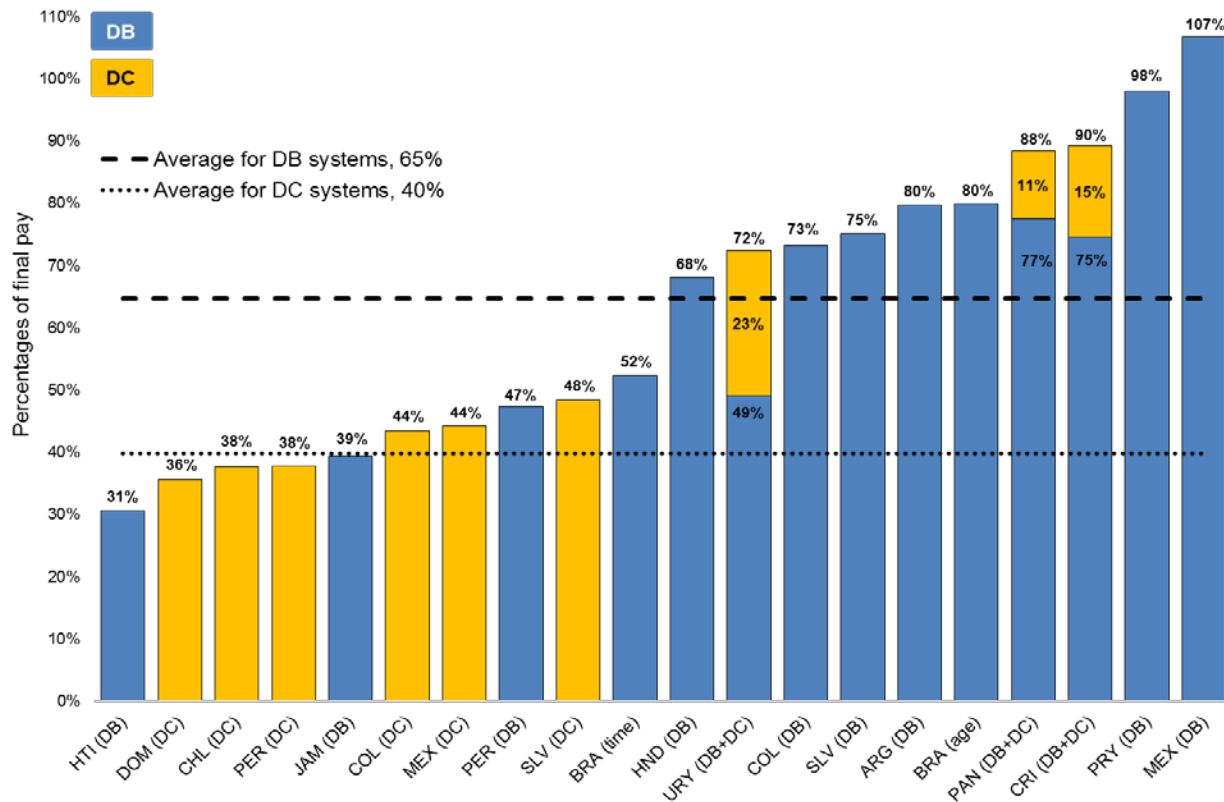

- Total rate of contribution density
- Women's contribution density
- Men's contribution density

Adequacy and redistribution:

- Replacement rates*
- Implicit rates of return*
- Implicit subsidies/taxes*

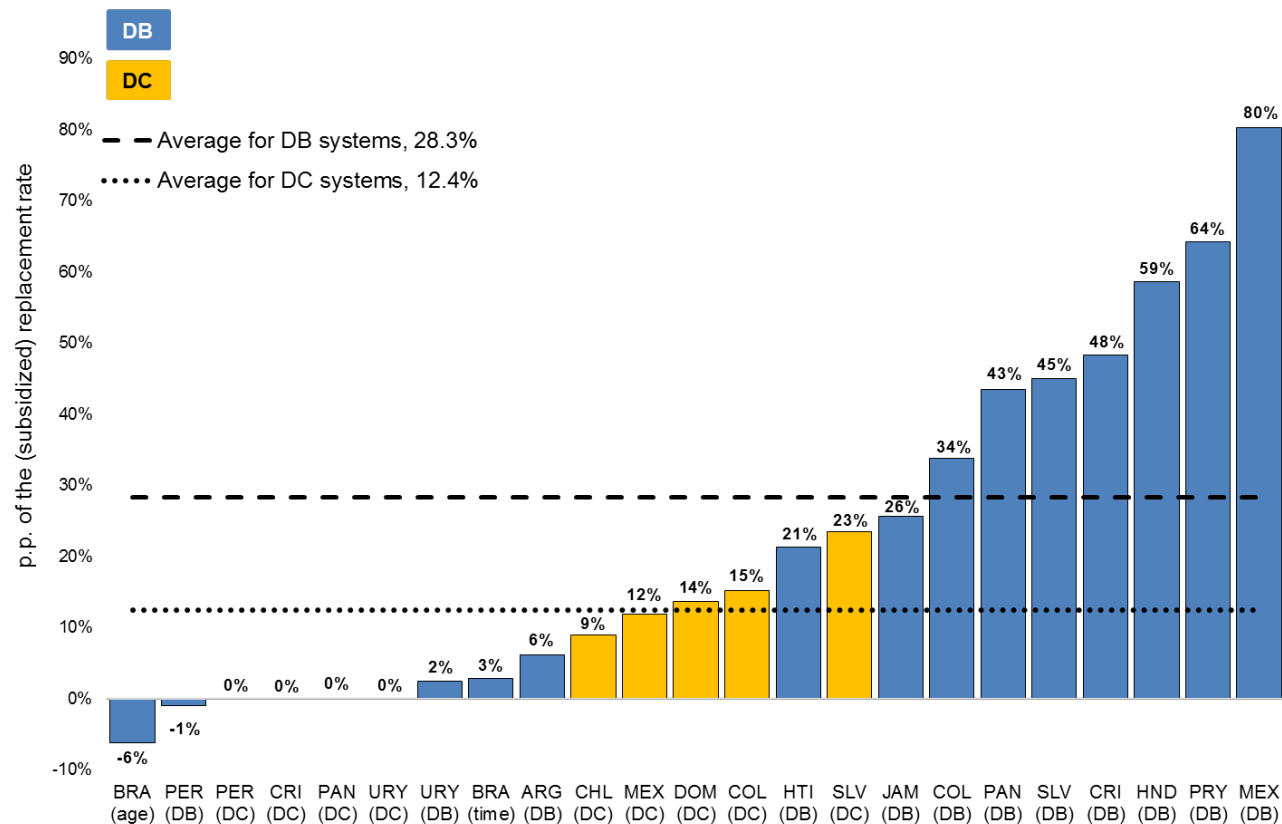

*Density and income dependant

New indicators: Replacement rates

Source: IDB Flagship

New indicators: Subsidies/Taxes as % of replacement rates

Source: IDB Flagship

New indicators: Implicit rates of return

Source: IDB Flagship

Sustainability

Indicators on the fiscal and social viability of the pension system under the current situation, given the current demographics and the current legal parameters of the pension scheme.

Fiscal:

- Pension spending projections
- Contribution projections
- Pension Superavit (Deficit)
- Pension Fund Assets, % GDP

Social:

- Projected replacement rates
- Adjusted replacement rates

Preparedness for Aging and Reform

Financial literacy and knowledge of retirement systems, as well as a set of some broader indicators of elderly welfare.

Awareness:

- Statutory retirement age awareness
- Contribution rate awareness
- Pension formulae awareness
- Fee charged awareness

Preparedness:

- Old-age poverty rates
- Educational attainment
- Co-residency
- Family size
- Financial wealth
- Homeownership

The database

The screenshot shows a spreadsheet interface with a table of contents. The table has five rows, each with a numbered icon in the first column and a topic in the second column. The topics are: 1. Environment (Demographics, Economics, Labor Market, Capital Markets), 2. Pension Design (Description, Parameters, Governance), 3. Performance (Coverage, Contribution Density, Adequacy and Redistribution), 4. Sustainability (Fiscal, Social), and 5. Society (Awareness, Preparedness). The spreadsheet also features the IDB logo and a book cover titled 'Red PLAC'.

**Houston,
we have a
problem!**

Main takeaways

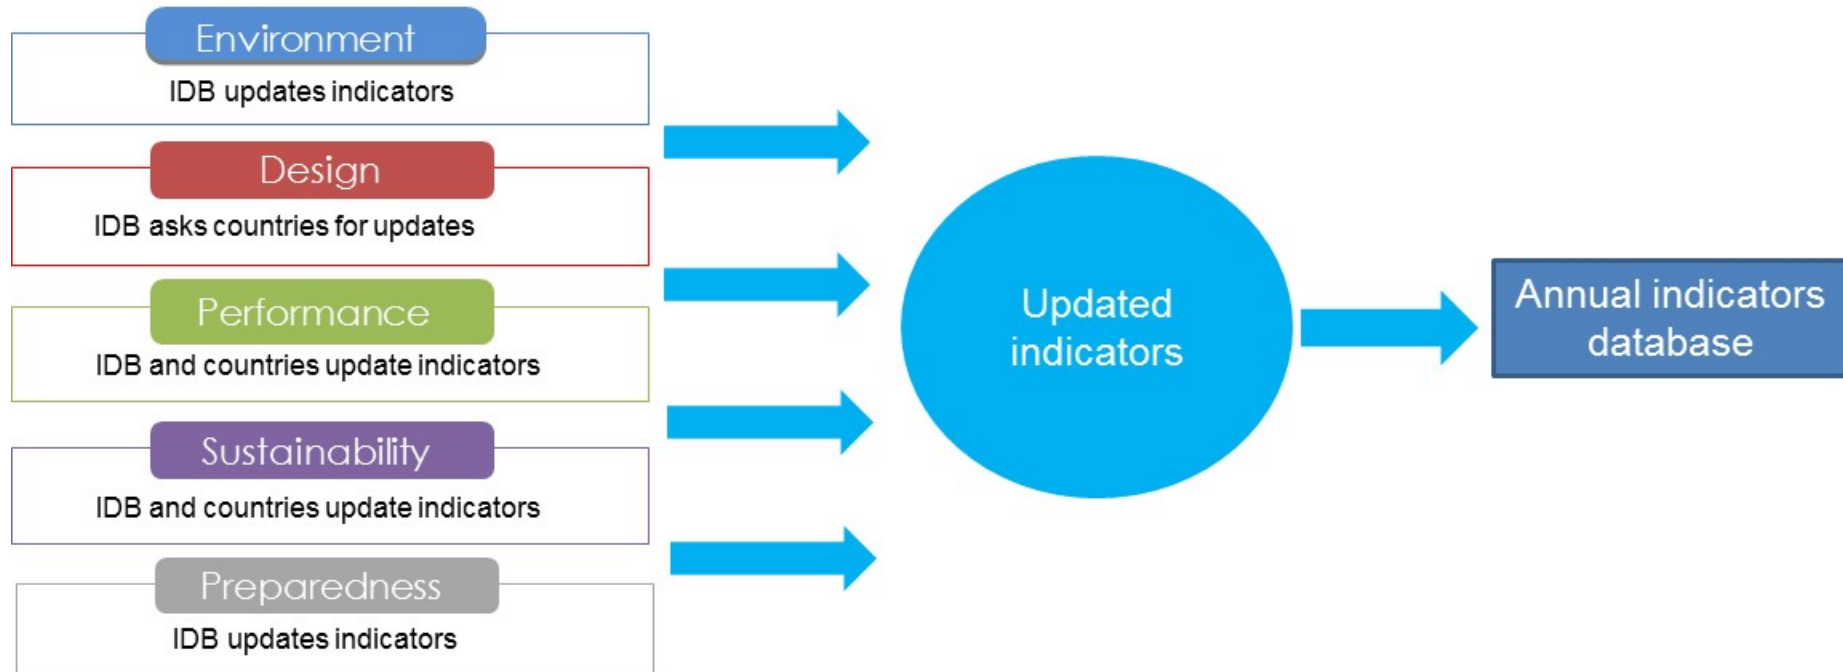

- What we have reached so far:
 - ✓ **Solid conceptual framework**
 - ✓ Probably the **largest pension dataset** in the region with novel indicators
 - ✓ **Countries and institutions involved**
- **Still a lot of work to be done!**
 - ✗ We were **unable to collect all data** (particularly difficult fiscal/actuarial data)
 - ✗ We need to think about how to **project** key indicators

We are starting phase II...

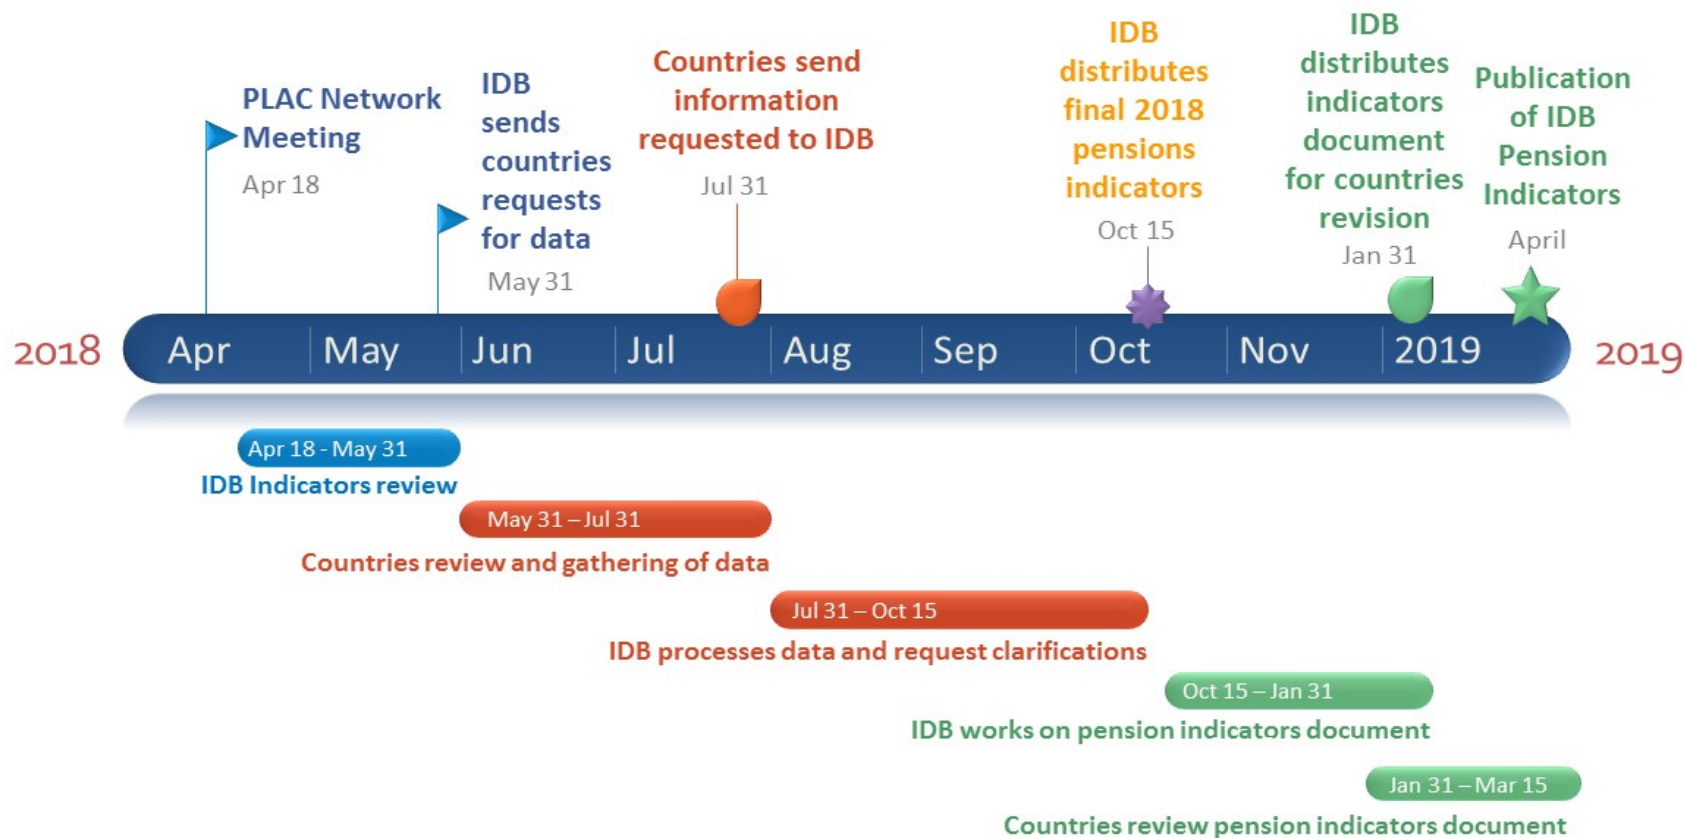

- March meeting in Washington, DC:
 - √ Comments by Advisory Board, countries and partner institutions
 - √ **Agreement on continuation of the project with countries support and annual indicators updates**
- Key areas with pending work:
 - × Sustainability dimension
 - × Forward-looking indicators (projections)

Protocol for indicators updates

PLAC NETWORK
Through countries technical contacts

Indicators updates: 2018-2019

More information?

Carolina Felix (Project coordinator): cfelix@iadb.org

Waldo Tapia (Project leader): waldot@iadb.org

Mariano Bosch (Pensions coordinator): mbosch@iadb.org
